## Disclaimer

This disclaimer applies to all courses where dentist will be working on patients.

Live Implant Training Institute, reserves the right to change these general security practices at any time without prior notice.

Early registration discounts, Last Call offers, and any Special Offer cannot be combined.

No refunds allowed during or after the course has been attended.

### LEVEL 1

Dr. Mongalo guarantees minimum placement of 17-18 implants during Level 1 Course:

That each doctor will operate on 6-8 patients reserved for him/her according to their surgical skill. This number of patients makes it possible to achieve such number of implants place.

2) Operating doctor unable to perform or complete the surgery due to his/her lack of surgical skills making it necessary that the supervising faculty completes the surgery. Unforeseen surgical errors on the part of the operating doctor such as perforations, breaking of cortical tables, sinus perforations, inadequate alveoplasty, inadequate flaps and damage the site, will force the patient to be lost and the expected number of implants will be reduced.

3) Doctor desiring to focus on placing only simple implants on partially edentulous patients (1, 2 and 3 implants at a time) because this is their patient population in their offices, he/she will not reach the 25-implant mark.

### LEVEL 2

If the doctor desires to focus his/her training on any of the following protocols, during the LEVEL 2 the number of implants will be greatly reduced due to the nature of these specific surgeries such as:

2) Doctors focused on learning Sinus lifts either intra-crestal and/or lateral windows, by nature reduce the number of implants since the focus is on the sinus elevation technique and not the placement of implants.

3) Bone grafting procedures such as socket preservations, ridge splits, ridge augmentation, will reduce the number of implants to be placed since bone grafting is a procedure needed to prepare the site before implant placement.

### LEVEL 3

Full arch immediate loading is a complex procedure that requires combination of advanced surgical skills with advanced prosthetic training. To obtain the desired result of loading the operated cases during the course, it is crucial that attending doctors must possess true advanced skills in both areas of surgeries and prosthetics and understand the following points:

Dr. Mongalo's team will screen and schedule three patients for each registered advanced doctor, each of these patients will need to be operated on a single full arch, please note that we cannot schedule patients for dual arches since the surgical and prosthetic time would increase to 6-8 hours per patient and this exceeds the time that patients can tolerate a procedure.

(2) While the attending doctor might consider himself to be advanced, it is our teaching experience that tells us that sometimes the line between intermediate and advanced can be blurred. If the operating doctor is unable to perform or complete the surgery due to his/her lack of surgical skills, it is necessary that the supervising faculty completes the surgery. Unforeseen surgical errors on the part of the operating doctor such as perforations, breaking of cortical tables, sinus perforations, inadequate alveoplasty, inadequate flaps and damage the site, will force the procedure to be aborted and that patient will count as one from the three selected cases, that case will not be replaced.

(3) Full Arch Immediate loading depends on doctor being able to perform the surgery in less than 120 minutes. These 2 hours start with anesthesia and placing of all implants and bone grafting. If the doctor takes longer than 2 hours, he/she will not load the case since the prosthetic portion can take more than the surgical time.

(4) Doctor Mongalo guarantees to have 3 arches but if the torque does not reach 35 Newtons on all implants placed, the case will not be loaded. This depends on the patient's quality and quantity of bone. The case will count as one of the three cases and will not be replaced.

(5) Dr. Mongalo has trained over 120 advanced doctors taking level 3 and no doctor has ever loaded all 3 cases for different reasons listed above. Typically, most doctors end up loading 1 or 2 or the 3 selected arches.

### Keep in mind that we are dealing with patients that can:

Change their mind on the proposed treatment plan at the last minute

2. Sudden changes in medical status that will preclude from undergoing treatment

3. Problems with transportation or other personal issues that will result in no-shows

4. Have underlying health problems not detected during the screening process that can result in hemorrhage, poor bone quality which will change the proposed surgery or become anxious and making the surgery impossible.

There are also other unpredictable factors such as:

Acts of God. These are defined as "an event that directly and exclusively results from the occurrence of natural causes that could not have been prevented by the exercise of foresight or caution; an inevitable accident. Courts have recognized various events as acts of God -tornadoes, earthquakes, death, COVID-19, extraordinarily high tides, violent winds, and floods. Many insurance policies for property damage exclude from their protection damage caused by acts of God". Such nature occurrences can affect the number of patients available for treatment during that training.

## Cancellation Policy

### **Dr. Mongalo will not tolerate unprofessional behavior, this includes the following:**

1. Not following instructions dictated by the supervising faculty. Arguing with your faculty or Dr. Mongalo in front of patients is not acceptable. Any clinical difference of opinions must be presented in writing and addressed in private to Dr. Mongalo.
2. Treating patients inhumanly, not following US standard of care. Leaving patient unattended while operating is not acceptable. While there is a surgery being performed, no person in the team (faculty, resident, attending doctors, assisting doctor) will be allowed to leave the room.
3. Performing procedures that the attending Doctor wants but that the patients do not need. If you need to learn a particular surgical technique, advise Dr Mongalo so he can seek the appropriate patient for you keeping in mind that all patients must match the operating doctor surgical level.
4. Stealing patients assigned to others, not following group rules such as abandoning your partner. If your partner assists you for 3 hours, you owe him/her the same courtesies. Assisting is a great educational tool and will learn as much as operating.
5. Inciting negative group comments without approaching Dr.Mongalo the Course Director. The faculty, surgical residents and other attending doctors cannot and will not solve any problems or concerns that attending doctors might have related to room assignment, patient selection, case distribution, expectations, facilities, etc... the only person that can and will solve these issues is Dr. Virgil Mongalo. In order for him to address any problems or concerns he must be notified early during the week. Any and all complaints must be presented to Dr. Mongalo no later than the 2nd day of the course, which is Monday at the end of the surgical day. If complaints are presented on Thursday-Friday it will be too late to correct them since the course is close to completion.
6. Attend course after a night of alcohol beverages or narcotics consumption that will interfere with your abilities and/or exhibiting unprofessional behavior in ways you would not behave in your office.
7. The course is taught in English. The faculty and residents will speak English during the course. The attending doctors are required to speak English as well even if you are working with someone that speaks your native language, this is considered disrespectful to the rest of doctors, faculty and residents.

### **Promotional Material:**

Live Implant Training (LIT) reserves the right to use any photograph/video taken at any event sponsored by LIT, without the expressed written permission of those included within the photograph/video. LIT may use the photograph/video in publications or other media material produced, used, or contracted by LIT, including but not limited to social media channel, brochures, invitations, books, newspapers, magazines, television, websites, etc.

### **CANCELLATION POLICY:**

Our entire teaching staff must block out their working schedule. Patients are screened three months prior to course commencement. \*Due to the exclusive nature of this training, Dr. Mongalo has limited attendance to 8 advanced licensed doctors from all over the world. USA licenses are not required.

\*Refunds are not allowed during or after the attending doctor has attended session #1.

\*Full refund of deposit will be issued minus credit card bank fee if the registered doctor sends a written notice 90 days prior to session #1 commencement. Live Implant Training Institute reserves the right to change these general security practices at any time without prior notice

### **COVID-19 POLICY**

If you are COVID 19 positive, you are required to submit via email at Ethel@askdrmongalo.com test results of SARS-CoV-2 RT-PCR. LIT does not accept Rapid Test, because of high percentage of false positives.

If you fail to submit the results via email four weeks prior to your course commencement, your will forfeit your entire course payments.

If you send your test results of SARS-CoV-2 RT-PCR, your course will be reschedule within six months and your entire payment will be transfer to the selected course date.

In case of a country lock down the tuition for that course will be transfer to a later date, there will be no refunds under any circumstances,

**I have read, understand and accept Live Implant Corporation rules, regulations and cancellation policies.**
